ProVideo Solutions to Represent Fast Forward Video's State-of-the-Art DVR Products to South-Central U.S.

New Partner to Provide Localized Expertise and Representation as FFV Broadens Its Market Scope

IRVINE, Calif. — June 23, 2009 — Fast Forward Video (FFV) has signed an agreement with ProVideo Solutions to represent FFV's full line of broadcast-quality digital video recorders (DVRs) in Texas, Oklahoma, Arkansas, and Louisiana. ProVideo Solutions is a video equipment manufacturer's representative to the broadcasting and professional audiovisual industries.

"Fast Forward Video has the right products at the right time, as broadcasters search for solutions that integrate into their new digital infrastructures and continue the transition from tape- to server-based production," said Eric Cook, president, ProVideo Solutions. "With its unique and highly advanced systems for HD recording, FFV has positioned itself to be successful in today's market, which is ever-more focused on HD solutions."

"We're pleased that ProVideo Solutions will be representing our products to such a dynamic and rapidly growing segment of the U.S. video equipment market," said Harry Glass, vice president of sales for FFV. "As we continue to broaden our market presence throughout the U.S., partners such as ProVideo Solutions will provide the on-the-ground technical expertise needed to effectively offer our products to the reseller community."

###

About ProVideo Solutions

ProVideo Solutions is a manufacturer's representative to professional video dealers and resellers in Texas, Oklahoma, Arkansas, and Louisiana. increasing product awareness and exploring new market opportunities for its product lines, ProVideo solutions offers a complete interface between customers, integrators, and manufacturers — as well as qualified technical support. For more information, visit www.provideosolutions.net.

About Fast Forward Video

Fast Forward Video designs, manufactures, and markets digital video recorders, board-level solutions, and time code generator/readers for professional broadcast, presentation, industrial, and military applications worldwide. Founded in 1985, the company was the first to incorporate digital computer technology, including random-access disk storage and data-compression capabilities, into professional video products. Today the company provides video technology solutions to a wide range of markets. Additional information is available at www.ffv.com.
